Pragati Vidya Peeth
Class X (90%) · 2020

INTERESTS

- ▶ Competitive Badminton
- ▶ Travel & Cultural Exploration
- ▶ Behavioural Marketing
- ▶ Creative Campaign Design

PROFILE

AI-orchestration architect and growth strategist who runs multiple AI models in parallel like a team of specialists, each one testing lead strategy, content, and psychology-led messaging simultaneously to find what converts fastest. I turn ambiguous briefs into go-to-market systems positioning, funnels, and culture-fluent creative, then ship the product myself, AI-built end-to-end, to prove the strategy actually works.

EXPERIENCE

OURi.OUT × Periodically — Head of Growth & Product Strategy

Remote

Jan 2025 – Present

- Own end-to-end growth strategy across the portfolio translating client vision and product capability into go-to-market plans, positioning, and pricing narratives that convert market insight directly into sales.
- Orchestrate multiple AI models in parallel, one testing lead-gen angles, another A/B-ing content hooks, another modelling customer psychology, compressing weeks of manual research and testing into hours.
- Scale brand reach **3x** by pairing psychology-led content frameworks with culture-fluent, meme-native creative that turns overlooked or stigma-heavy categories into shareable, high-engagement stories.
- Direct product positioning and feature-to-message mapping alongside founders, ensuring every release ships with a growth story and conversion path already built in.
- Design and build the products behind the strategy end-to-end using AI-native development, so every go-to-market plan is stress-tested against live software, not just a slide deck.

PROJECTS

MapGalli — Hyperlocal Street-Food Discovery

React · Geolocation API · Mapbox

- Built a map-native discovery experience using real-time geolocation to surface active street-food stalls that every mainstream delivery app overlooks.
- Designed a Hindi-first, zero-training vendor console so non-technical cooks manage listings, schedules, and live menus with zero friction.

Periodically — Cycle Dashboard + Campaign Suite

React · Vercel · HSL Color Systems

- Designed a phase-aware dashboard that shifts colour theme and copy to mirror the user's active cycle stage, plus a partner view that reframes biology as everyday, practical context.
- Led the brand's **full D2C campaign suite** end-to-end UGC-style posts, editorial posters, meme-native content turning a taboo topic into a scroll-stopping, sign-up-driving story.

PadhAI — Conversational AI Homework Helper

React · Node.js · AI Prompt Engineering

- Engineered a prompt system that explains STEM and humanities concepts in fluid Hindi-English-Hinglish, replacing clinical bullet points with warm, human explanation.
- Shipped a zero-signup web client so any student gets a clear answer in one tap no account, no paywall, no friction.

LEADERSHIP & ACTIVITIES

Igniters Club, VIT — Vice President

2023 – 2024

- Spearheaded entrepreneurship initiatives, pitching early-stage startup ideas at university innovation summits and inter-college competitions.
- Coordinated cross-functional student teams across innovation sprints and inter-club collaborative events.
